Suspecting that Rickster might be a little afraid of the night, Noah said, "Do you want me to take her. But SD's were already pouring out of the guardroom behind the main doors of the Government Center and racing along the corridor toward the communications facility while civilians flattened themselves against the walls to get out of the way, and others who had been working late peered from their offices to see what was happening. The engineer iii coveralls who had been working inconspicuously at an opened switchbox through an access panel in the floor closed a circuit, and a reinforced fire-door halfway along the corridor - closed itself in the path of the oncoming SD's. The SD major leading the detachment stared numbly at it for a few seconds while his men came to a confused halt around him. "Back to the front stairs," he shouted. "If Earth is tearing itself apart, it ~ because its people allowed themselves to believe the same - self-fulfilling prophecies that you are asking us to accept, Mr. Stern. But we reject them. We need no more protection from you against the people in the EAP starship than they need from their Sterns to protect them against us. We have no need of that kind of strength. Is it strength for neighbors to fortify their homes against each other, or is it paranoia? You must feel very insecure to wish to fortify an entire star system." Stern's mouth clamped into a grim, down turned line.. "Well . . . some of them, a long time ago, maybe. But not modern ones..". - out of the way. It was a communication from Leighton Merrick, the Assistant Deputy Director of Engineering in the Mayflower II, routed for comment via Headquarters and Brigade. It advised that, due to an unexpectedly high rate of promotions among junior technicians, Engineering was flow able to give "due reconsideration" to the request for transfer filed by Staff Sergeant Colman. Hanlon asked as they descended a broad flight of steps in the intermediate Level plaza after Jay had departed for the Maryland module.. Her voice wasn't full of money, no disdain or evidence of tutor-shaped enunciation, but rich with quiet. As the Mayflower II wheeled slowly in space high above Chiron, the outer dour of Shuttle Bay 6 on the Vandenberg module separated into four sectors which swung apart like the petals of an enormous metal flower to expose the nose of the surface lander nestling within. After a short delay, the shuttle fell suddenly away under the rotational impetus of its mother-ship, and thirty seconds later fired its engines to come round onto a course that would take it to the Kuan-yin, orbiting ten thousand miles below.. Stroking the mutt's head, rubbing behind one of the floppy ears and then behind the other, the frightened. especially as

this was a truth that she had so long avoided contemplating..Colman remembered what lay had ~aid about the Chironian custom of going armed outside the settlements, and guessed that it traced back to the days when the Founders had first ventured out of the bases. Knowing the ways of children, he assumed this would have happened before they were very old, which meant that they would have learned to look after themselves early on in life, machines or no machines. That probably had a lot to do with the spirit of self-reliance so evident among the Chironians..fantastic and unlikely, might be waiting for you in a closet..And for such a system the universal law was not death, but life..Then is there any difference?'.Congress?sometimes he calls it the Parliament of Planets?and those plans will take time to carry out..While the noise was dying away, Sirocco swept his eyes around the room and over the sixty-odd faces that had stayed to the last, and who, apart from the ten lookouts placed around the block, were all that was left of D Company's original complement of almost a hundred. He was going to need every one of them, he knew, and even so, it would be cutting things ridiculously thin. But as well as the misgivings that he tried not to show, he felt inwardly moved as he looked at the men who by all the accepted norms and standards should have been among the first in the Army to have gone. But apart from the SD units, D Company's record was second to none. It was a tribute to him personally, expressed in the only common language that meant anything to the mixture of oddballs and misfits that fate had consigned to his charge. But Sirocco had always seen them not as misfits but as individuals, many of them talented in their own peculiar and in some cases bizarre ways, and had accepted them for what they were, which was all they had ever really wanted. But the term misfit was a relative one, he had come to realize. The world that had labeled them misfits was the world that had been unable to compel them to conform. Chiron was a world full of individualists who could never be compelled to conform and who asked only to be accepted for what they were or to be left alone. Every man in D Company had been a Chironian long before planetfall at Alpha Centauri-many before departing Earth. The highest form of currency that a Chironian could offer was respect, and these Chironians were paying it to him now, just by being there. Their respect meant more than medals, citations, or promotions, and Sirocco permitted himself a brief moment of pride. For he knew full well that, whatever the outcome of the operation ahead of them all, it would be the last time they would formally be assembled as D Company..whenever they need it. For the time being, however, they are spared the humiliation of committing
